

# Discover A Superior Resource For Logistics Automation.

**W**elcome to CODEplus. We're a leading provider of logistics automation solutions. Since 1995, CODEplus has been developing software applications and systems for logistics, warehousing, and distribution enterprises located around the world. At CODEplus, our mission is clear—we help you to operate more efficiently within your enterprise and throughout your extended supply chain.

CODEplus features a **broad array of capabilities**, including software application development, systems design and integration, technical services, and IT staff augmentation. Whether using a new technology or leveraging your existing technology infrastructure, we will provide the ideal logistics solution for your business objectives.

With CODEplus, you'll discover **significant advantages**:

- Deep logistics and supply chain experience.
- Quick to market software and system development using cutting edge technologies.
- Proficient with any industrial hardware and software platform.
- A full continuum of application foundations, easily customizable to enable rapid implementation, competitive advantage, and improved mean time to ROI.
- Proven successes with organizations having extensive distribution requirements such as government agencies and Fortune 500 companies, including airlines, defense contractors, and the world's largest postal service.
- ISO 9001 certified since 2000.
- 85% of CODEplus customers come from repeat business.

Additionally, CODEplus has developed an **innovative product line**, drawing on our extensive software and systems engineering experience. Our product suite features logistics automation solutions, including bar code and RFID. We also offer quality management and control systems, as well as performance management solutions.
